

DC-DC Power Supply

This compact DC-DC converter is suitable for powering our full range of Laser Diode Modules, Diode Pumped Solid State Modules and Laser Receivers.

The unit produces a regulated DC output which can be adjusted to suit most applications.

Input voltage 12-32V DC
Output voltage 3-6V DC
Output Current (max) 250mA

AC Mains Adaptor

This AC Adaptor is suitable for powering our full range of Laser Diode Modules, Diode Pumped Solid State Modules and Laser Receivers.

Input voltage 240V AC
Output voltage 3V DC
Output Current (max) 500mA

Battery Pack

This compact switched 3V battery pack is suitable for use with our full range of Laser Diode Modules.

The battery pack uses 2 standard 'AA' Alkaline Batteries.

Module Mounts

Laserex Technologies offers a range of fixed and adjustable mounting options to suit most applications.

If one of our standard mounts is not suitable for your application we will design a mount specifically for you.

Style 1 Fixed horizontal

Style 2 Fixed vertical

Style 3 Rotation, tilt and X-Y fine adjust

Style 4 Rotation & tilt
